

## **Job Description – Mechanical Design Engineer**

We are a well established engineering design consultancy who are always looking to add skilled design engineers to our team. We currently have a vacancy available to work in our offices in the West Midlands.

This is a good opportunity for a mechanical design engineer looking to improve and broaden their skill set by working on projects across several engineering industries. The candidate will be required to work as part of a team, and will also be comfortable working on their own initiative. The candidate should be self motivated and should enjoy rising to challenges, when required to solve engineering design issues or find solutions.

The candidate should:

- Be a good team player
- Have the drive to improve and learn new skills
- Be passionate and take pride in their work
- Be able to meet project deadlines

The candidate will ideally possess an ONC or HNC in mechanical engineering.

Experience in any of the following CAD packages will be considered:

- AutoCAD
- CATIA
- Creo or Pro/ENGINEER
- Inventor
- Solid Edge
- SolidWorks
- Unigraphics

We pride ourselves on providing a quality engineering design service. The candidate will have our principles in their mind set and will be looking to maintain and enhance the reputation of the company.
